GENESIS – *Foundations For Life and Work*

How to use this book: The goal of this workbook is to help you have greater success in your personal study and application of the Bible. During the week, you should read through the lesson questions, and then read the text and attempt to answer the questions in preparation for your small group. The lined pages on the right hand side are given to provide room for your answers.

In the actual group you may choose to cover all the questions of the study (which may result in the group taking longer than seven weeks) or the group leader may select 2–4 specific questions that they believe will be most profitable for discussion. Please use the method which is most fruitful for your group!
